

## **Welcome to the Veterinary Technician Cancer Society**

“Our mission is to be an advocate of the cancer patient and maintain the highest standards of care and treatment of animals with cancer. We attain this mission by promoting technician communication, education, and specialization in the field of veterinary oncology”.

The VTCS understands the challenges that are faced daily by oncology technicians. This welcome file is to help you face those challenges. We have included information on chemo safety products, references, VSPN (the support link of VIN), AIMVT (the oncology academy) and general information regarding our society. This information will continue to be updated as members submit their ideas to make it better!!

Be sure to keep us informed of any questions you may have or if any of your contact information has changed. We look forward to having you as a member of the VTCS!!
